

# TELESCOPES

## Newtonian Telescope

A 6" Newtonian Telescope is a best starter model for aspiring enthusiasm in Astronomy. Find our neighbouring planets, satellites, great stars with 96X - 240X zoom levels. Made for amateur astronomers, this small but beautiful piece is your personal window to the Universe.

## Cassegrain Telescope

This 6" Cassegrain Telescope has been developed taking into account middle level and serious astronomy enthusiasts. At stunning zoom levels from 96X to 240X and imported eyepiece sets, find our neighbouring planets, satellites, great stars and even meteors.

# OPTICAL COMPONENTS

We design and manufacture range of spherical, parabolic, hyperbolic, elliptical and torric mirrors as per customer's requirements. Widely used in scientific instruments like spectrophotometers, collimation sources as well as laser technologies.

These are specially made hemispherical glass domes used as a cover on Absolute Solar Radiation Sensor. Made in optical glass.
